

Quality Policy

The Management of Hofmann Engineering Pty Ltd. is firmly committed to a Quality Management System in accordance with ISO 9001 and AS 9100 standards.

The Management's objectives are to:

- Assure our Customers that the Quality of design, product, delivery and service is equal to or better than their expectations.
- Provide a working environment that encourages pride among our employees in our products and services.
- Ensure that the materials used are correct and the products and designs comply with the Quality Standards required by the specification, applicable Australian and/or International Standards, regulatory requirements and World's Best Practices.
- Provide a framework for establishing and reviewing Quality objectives.
- Provide objective evidence that all Quality requirements are as specified.
- Ensure that all personnel are competent in their area of responsibility and have access to all necessary documented information.
- Continually review the Quality Management System against the objectives of this Policy to ensure suitability and maintain continual improvement.

Every employee regardless of position is responsible for Quality. However, it is the Management's responsibility to provide the necessary leadership for achieving the Quality Objectives at all levels.

For this reason it is our policy to establish and maintain an effective and efficient Quality Management System, planned and developed in conjunction with other management functions such as Safety and Environment.

This Policy is issued to clearly indicate the commitment of Management to the long-term success of the company, our competitive position, reputation and profitability as well as both customer satisfaction and employee well-being.

Erich J Hofmann
